

## ***Trimax Rental Division***

### **Equipment Rentals**

For fifteen years Trimax Residuals Management has provided outstanding service in the residuals management field across North America. It has been largely due to our large fleet of mobile decanter centrifuges and hydraulic dredges that has given Trimax such an advantage. Trimax has now made that advantage available for all to benefit.

Trimax Rental Division offers sixteen high performance centrifuges, as well as three hydraulic dredges and other ancillary equipment to suit your residuals management needs. All of our equipment is mobile and well maintained for immediate use.

### **Reasonable Rates**

Trimax Rental Division does not compete like other equipment rental operations. Our rental rates are lower and more reasonable than any other rental locations in North America. Each rental is viewed on an individual basis with preference going to long-term rentals. Call today to get your individual quote.

### **Training and Commissioning Services**

Trimax will provide training and commissioning services in order to get your equipment up and running. A Trimax operator will travel to the site, commission the equipment, and train your staff to operate so that the equipment is handled in a safe and efficient manner. Maintenance and decommissioning services are also available.

### **Contact Us**

For more information regarding Trimax's Rental Equipment, please contact Bob Niedzielski at 800-465-2115 ext 246 or email [bniedzielski@amwater.com](mailto:bniedzielski@amwater.com). On the web, you can visit us at [www.trimaxenv.com](http://www.trimaxenv.com)
